MEDICAL HISTORY

Date	By	Code	Description	Qty (Variance)	Photo
12/16/2021	HC	9-59	Inj Vetergesic		
		3-5	Rescue Soc. FVRCP		
		13-12	Rescue Spay Package		
BAR, mm pink & moist, CRT 1.5 secs, heart rate & lungs auscultated normal, and NSF on abdominal palpation.					
Rest of physical exam within normal limits.					
Weight 2.02 kg					
TPR: WNL.					
Pre-Anesthetic Blood Test: Declined.					
ASA I					
Pre med DTK 0.12 ml IM.					
Intubated with 3.0 ETT.					
Maintained on Isoflurane 2% and oxygen 1 L/min through ETT					
Maintained with dedicated monitoring with pulse oxymeter and active warming device used.					
Procedure:					
Placed the cat in dorsal recumbency. Clipped and surgically prepared for ovariohysterectomy surgery. The left ovarian pedicle was exteriorized by breaking the suspensory ligament and double-ligated with PDS 3-0 suture. The same surgical procedure was performed on the right ovarian pedicle. The cervix was exteriorized and a circumferential and transfixation ligature with PDS 3-0 suture was placed and the entire uterus was removed. The subcutaneous layer was with Monocryl 3-0 suture and tissue glue was used to close the skin.
